

Description

Wall earthing receptacle, tested according to IEC 62561-1, Class "H" (Heavy duty), made out of copper alloy (Cu-A). The earthing receptacles are the points where the earthing exit from walls to be connected to the earthing of various equipment (e.g. aircrafts, bowsers, vehicles or at exit points of conductors which are embedded in concrete for the connection with the air termination conductors).

Typical application
